

API Contract

Project: PT Mahaga Widya Cita Corporate Website & Portal

Note: The platform heavily relies on Next.js Server Components and Server Actions. REST APIs are primarily exposed via Payload CMS automatically.

1. Articles API

GET /api/articles

Fetches a paginated list of articles.

- **Query Params:** `limit`, `page`, `sort`, `where[status][equals]=published`
- **Response:**

```
{
  "docs": [
    {
      "id": "uuid",
      "title": "Article Title",
      "slug": "article-slug",
      "category": { "name": "Tech" }
    }
  ],
  "totalDocs": 100,
  "totalPages": 10
}
```

GET /api/articles/[id]

Fetches a single article by ID or Slug.

2. Newsletter API

POST /api/newsletter

Subscribes a user to the newsletter.

- **Payload:** `{ "email": "user@example.com" }`
- **Response:** `201 Created`
